PaperCut
Reseller

Focus on Patient Health, PaperCut Has Printing Covered

Ensure security and accountability for printed PHI on your network.

What PaperCut can do for your Healthcare Organization

- Security for Copy & Print Devices
- EMR Support/ Integration
- Increase HIPAA Compliance
- Reduce Print & Copy Costs
- Increases Productivity
- Reduce Paper Waste

Simplify Printing

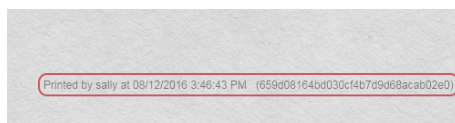

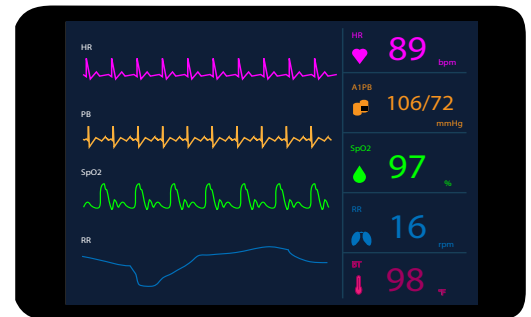

Use Find-Me Printing, a feature synonymous with PaperCut to save time for and simplify printing for end users.

Secure Printing

Whether printing to the find-me print queue or a specific device, eliminate potential HIPAA breaches at the print devices by using secure print release.

On The Go Printing

Leverage all of the benefits of printing from a mobile device without sacrificing security, accountability and compliance standards.

Digital Signatures and Watermarks

Digital Signatures and Watermarks provide accountability for all print jobs in your network, helping tremendously with HIPAA compliance efforts and training to prevent future fines.

Focus on Patient Health, PaperCut Has Printing Covered

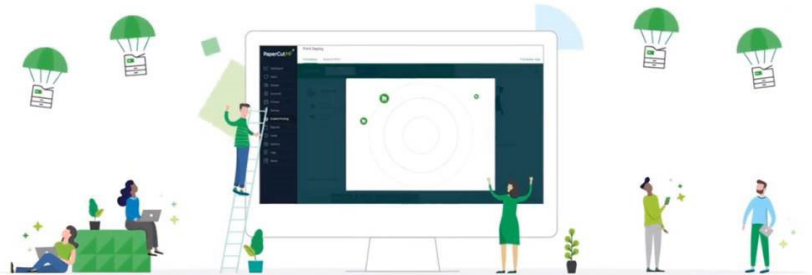

Saving time is just as important to the IT admin staff as it is for the medical staff and end users. The IT administrators need to make printing easy while also incorporating best compliance practices when it comes to handling printed PHI. PaperCut has the tools to simplify and automate print related management allowing IT management to spend time where it matters most.

Print Deploy

Spend more time on more important projects than managing print drivers and print queues. Automate this process with predefined rules that allow end users to print where needed based on location or credentials.

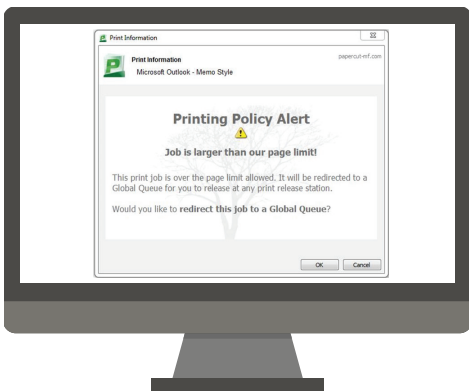

Enables:

- Medical staff on the go
- Worry free print enablement
- Focus on other tasks
- Eliminate print server

Print Policies

Implementing best-practice print policy rules within your organization can be an effective way of encouraging users to take responsibility for their printing habits while enforcing your print policy.

Everyday Policies:

- Remind users via a desktop pop-up or at the MFD to print in duplex
- Route large jobs to dedicated high-volume printers
- Discourage users from printing emails or printing emails in color
- Discourage printing web pages in color

Print Visibility

Instantly see who is printing, what they're printing, when they printed, and on which device. View the central dashboard, any of the 80 pre-built reports and the document archive (so you never have to chase down answers again).

EMR / EHR Printing

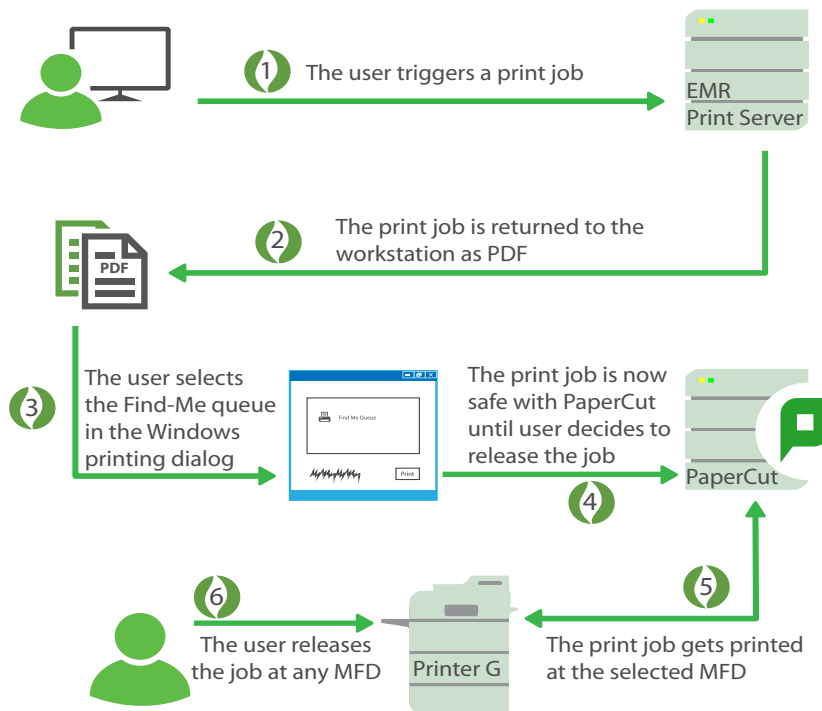

Track backend printing from your EMR/ EHR Software systems without impacting workflow. PaperCut MF seamlessly integrates with EMR (electronic medical record) solutions such as EPIC, Cerner, and AllScripts.

Healthcare Module & Interconnectivity for EMR Systems:

PaperCut enables you to save paper, provide an audit trail and securely print from your EMR system. Leverage the ability to hold print jobs until the user authenticates and releases them at any PaperCut enabled device. Print jobs are routed to the right printer and the right paper tray making it seamless for end users on the go.

Ensure security and accountability for printed PHI on your network.

What the PaperCut config typically looks like for secure printing from other EMR systems:
