

A PARTNERSHIP FOR BUSINESS INTELLIGENCE

Introducing Intuitive DX from print to digital

Intelligent solutions from leading industry experts **Intuitive and ecoprintQ**.

Visualise the data in your PaperCut MF print management systems.

Provide added value to your customer and enable digital transformation

Introducing Intuitive DX - a new dashboard suite that leverages the power of PaperCut MF data

With print volumes down and hybrid working here to stay, print resellers need to grow new revenue streams. But how do you bridge the gap between your current portfolio and new products such as ECM, workflow, and process automation?

Intuitive DX could be the answer!

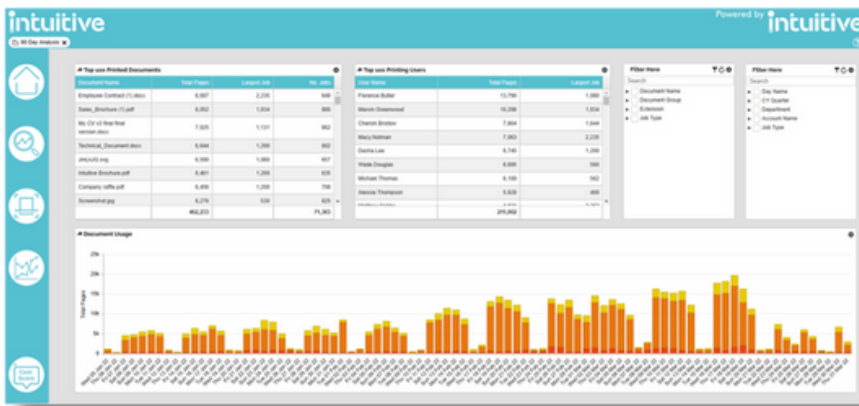

What does Intuitive DX include?

1. A new set of dashboards
2. Designed for resellers to deliver additional value to their customers
3. Easy to highlight opportunities for digital transformation
4. Free of charge for engaged partners and Advanced Resellers

Intuitive DX is an additional suite of pre-built dashboards that help identify hidden user printing behaviours and shed light on these operational processes. Use the information contained within your customer's print data to highlight opportunities for digital transformation.

Intuitive DX includes:

1. Four pre-built dashboards that use existing Intuitive for PaperCut data
2. New ways of navigating through print data, with more powerful and deeper analysis of user behaviour to allow you to spot opportunities for digital transformation
3. Consistent Look and feel – uses Intuitive's familiar dashboard styling

- ▶ 4 pre-configured dashboards
- ▶ Designed for resellers to deliver additional value to their customers
- ▶ Easy to highlight opportunities for digital transformation

Use Intuitive DX to:

- Give an overview of the top departments' print / scan / copy volumes over the last 12 months
- See detailed document usage breakdown of all activities over the last 90 days.
- Drill into the document usage component to show the jobs performed on that given day.
- Drill into a single department to show a filtered view on the 90-Day Analysis dashboard.
- See our "Cost Score" metric that helps to identify notable departments for investigation.

Getting Started

Pre-requisites

- Existing installation of Intuitive for PaperCut MF (V3.0 onwards).
- Intuitive for PaperCut MF fully set up
- Ideally you will have at least 3-12 months of data.

How to deploy

- Simply download the Data Discovery XML, and add to the Intuitive server.
- Grant user access these dashboards
- Start working with your customers to analyse the data
