Touch screen terminal for access control & management of printers and MFPs

How Does it Work?

cPay allows users to choose how they pay for print and copy jobs. It connects to all major copier brands and provides payment including virtual payments like but not limited to, PayPal, Apple Pay, Android Pay, and Samsung Pay as well as major credit/debit cards.

- cPay manages copies and prints on a single interface
- Interface allows user friendly authentication by code, Login/password on the touch screen or by optional contactless, magnetic or bar code cards
- cPay allows users to add credit to an existing PaperCut MF account, with the remaining balance available for future use
- PaperCut users and guests can print from their desktop or mobile devices and release their jobs at the cPay

Options:

- Nayax Credit Card Terminal  
 - * Need to register an account with Nayax payments
- Authentication readers (barcode, mag stripe, prox)
- Network: built-in switch
- Supported System: PaperCut MF
 - * Cilantro annual subscription

Specifications

Height: 1.5 in
Width: 5 in
Length: .5 in
Weight: 1 lb

Features and Benefits

Pay-per-use or Pay-as-you-go: guests don't need to create an account to pay for copies or prints

cPay works with Nayax, credit card terminal. An easy solution to set up and manage your account

cPay can create a user account and add credit in one session

PaperCut MF users may print directly from their own mobile, tablet or PC through an application or web interface

The intuitive touch screen user interface allows a quick start on first use, displaying the user's credit before and after

Besides having a user friendly interface, the cPay is easy to install and easy to use
